ANZ 2017 Final Dividend - key dates and associated information -

As part of ANZ's full year 2017 financial results released today, the Group announced a proposed fully franked 2017 Final Dividend of 80 cents per share. This brings the total dividend for the year to 160 cents per share. New Zealand imputation credits of NZ 10 cents per share will also be attached.

ANZ announced an intention to neutralise the impact of the shares allocated under the Dividend Reinvestment Plan (DRP). DRP participants do not need to take any action in respect of this in order to receive shares under the DRP.

The neutralisation of the DRP is expected to involve shares being purchased on-market during the DRP Pricing Period by a third party appointed by ANZ. To the extent that the on-market purchase is not able to be completed for any reason, then ANZ will issue new shares to meet its obligations under the DRP.
