different bank

Morgan Stanley Investor Conference

Brian Hartzler
Group Managing Director, Personal

A good year – met our targets again

Headline profit	↑	16.2%
Cash* profit	↑	13.8%
Revenue Growth	↑	8.4%#
Profit Before Provisions	↑	10.4%
Cash* EPS	↑	13.2%
Dividend	↑	13.6%

Return on equity back above 20%

Cost-Income ratio improved by 1.0%

Different strategy delivering results

Australia

- Personal outstanding, engine of Group revenue, high customer satisfaction
- Institutional regained #1 position

New Zealand

- Good operational momentum
- Financial results earlier than expected

Asia/Pacific

- Asia – 26% revenue growth
- Pacific – 15% revenue growth
- Partnerships creating value
 - Sacombank & Panin valued well above book
 - 1m credit cards now on issue in Asia

But some areas where we need to do more

- Speed up Asian expansion
- Advance wealth and private banking

Invested against the trend

- Now seeing the payback
- Accelerated investment spend in 2nd half
- Considerable investment in de-risking contributing to lower provisions

Good performance from Divisions, particularly Personal

Additional Information

Early signs of a slight deterioration in credit quality

The cycle has turned with higher interest rates & fuel costs impacting some consumers, but 90+ days still at low levels

Growth has mainly been in the Australian highly secured portfolio (90+ days past due loans Aust.)

Mortgage concerns have largely been in NSW

(90+ days past due % GLA* by State)

Credit card losses result from four key drivers aside from outstandings growth

1 1Cut-off scores are set to maximise risk adjusted revenue (RAR)

(A)	(B)	(C)	(D) = C-B
Population Decile	Total Credit Provisions Rate	Revenue (Interest + Fees)	Risk Adjusted Revenue
10%	5%	9%	4%
10%	4%	7%	3%

Source and channel:

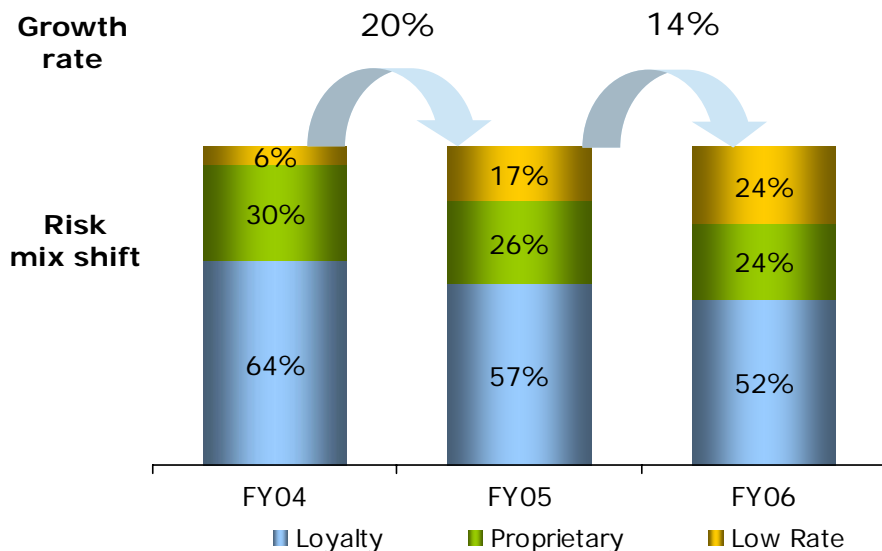

Existing customers have lower losses than new customers

Branch-originated accounts have lower losses than phone and internet-originated accounts

— Revolver - Higher Credit Costs — Medium Credit Costs — Transactor - Low Credit Costs

Note: Inherent credit card losses are in turn inflated/deflated by the economic cycle and the effectiveness of collections activity.

ANZ's losses driven by product mix shift and prior years' outstandings growth

Loss rates likely to increase as low rate balances 'season'

(Loss Rates by Vintage by Product Index YR1 = 100)

SUMMARY

- Credit card loss growth due to shift to higher-revolving, low rate products and portfolio seasoning
- Credit quality remains sound. There is no deterioration of loss rates within product segments, year of booking, cut-off score, or channel/source
- To offset the expected impact of a the economic cycle, we are increasing collector numbers and refining collections strategies/tactics

Australian personal bankruptcy differs from UK

Key factors for increasing UK losses:

- aggressive competition
- weakening credit standards
- relaxation of bankruptcy laws in 2004

ANZ experienced above system unsecured lending growth & slight increase in bankruptcies:

- growth achieved with minimal change to credit standards
- no changes in Australian bankruptcy laws
- enhanced risk management strategies implemented

Slight increase in Australian bankruptcies/debt agreements...*

(Aust. Non Business Bankruptcies and Debt Agreements)

...rate of growth significantly below UK*

(Personal bankruptcies and debt agreements, quarterly data yoy growth)
