## **4. Update of the Recent Developments Section - ANZBGL notes release of APRA's loss-absorbing capacity discussion paper**

On 8 November 2018, ANZBGL noted the release of APRA's discussion paper titled "Increasing the loss-absorbing capacity of ADIs to support orderly resolution". The paper is in response to recommendation three of the Final Report of the 2014 Financial System Inquiry ("**FSI**")<sup>1</sup>. The paper proposes an increase in total capital requirements of between 4% and 5% of risk-weighted assets ("**RWA**") for domestic systemically important banks ("**D-SIBs**"), such as ANZBGL. Based on the Group's RWA of A\$391 billion as at 30 September 2018, this represents an incremental increase in the total capital requirement of approximately A\$16 billion to A\$20 billion, with an equivalent decrease in other senior funding. APRA anticipates that D-SIBs would satisfy the requirement predominantly with additional Tier 2 capital. D-SIBs will need to satisfy the new requirement by 2023<sup>2</sup>. ANZBGL intends to consult with APRA and provide a response.

## **5. Update of the Summary of the Programme**

The Summary of the Programme included in the Base Prospectus is made up of disclosure requirements known as 'Elements'. These elements are numbered in Sections A-E (A.1 – E.7). Following the release of the 2018 Annual Report, Elements B.12 and D.2 of the Summary of the Programme, in respect of ANZBGL and its consolidated subsidiaries, are updated as follows:

<sup>1</sup> Pages 67-75 of the Final Report of the FSI which recommended that the Australian Government "implement a framework for minimum loss absorbing and recapitalisation capacity in line with emerging international practice, sufficient to facilitate the orderly resolution of Australian authorised deposit-taking institutions and minimise taxpayer support"

<sup>2</sup> D-SIBs have an implementation period of four years from the release of the final total capital requirements (expected in 2019).

| D.2   | <p><b>Key risks that are specific to the Issuer</b></p>   | <p>There are a number of factors which could cause ANZBGL's actual results to differ, in some instances materially, from those anticipated. By investing in the Notes, an Investor is exposed to the risk that some or all of these factors could negatively affect ANZBGL and, in turn, negatively impact the value of the Notes.</p> <p>As a bank, ANZBGL's activities are exposed to a complex and varied set of risks. If any of these risks materialise, there is the potential they could adversely impact ANZBGL's business, operations and financial condition.</p> <p>The key risks inherent in ANZBGL's operations can be broadly grouped under the main categories of:</p> <p><b>capital adequacy risk</b> (being the risk of loss arising from ANZBGL failing to maintain the level of capital required by prudential regulators and other key stakeholders (shareholders, debt investors, depositors, rating agencies, etc.) to support ANZBGL consolidated operations and risk appetite);</p> <p><b>compliance risk</b> (being the risk of failure to act in accordance with laws, regulations, industry standards and codes, internal policies and procedures and principles of good governance as applicable to ANZBGL businesses);</p> <p><b>credit risk</b> (being the risk of financial loss to ANZBGL resulting from: a counterparty failing to fulfil its obligations; or a decrease in credit quality of a counterparty resulting in a financial loss. Credit risk incorporates the risks associated with ANZBGL lending to customers who could be impacted by climate change or by changes to laws, regulations, or other policies adopted by governments or regulatory authorities, including carbon pricing and climate change adaptation or mitigation policies);</p> <p><b>insurance risk</b> (being the risk to ANZBGL of unexpected losses resulting from worse than expected claims experience, including any of the following that expose an insurer to financial loss: inadequate or inappropriate underwriting, claims management, reserving, insurance</p>   |               |               |               |               |                                |     |     |     |                                     |      |      |      |                                       |     |     |      |                                       |     |     |     |                        |     |     |     |                            |       |       |       |                       |       |       |       |                                  |       |       |       |                                      |       |       |       |   |       |       |       |

This includes legal risk, and the risk of reputation loss, or damage arising from inadequate or failed internal processes, people and/or systems, but excludes strategic risk);</p> <p><b>reinsurance risk</b> (being the risk to ANZBGL that a reinsurer fails to meet its contractual obligations, that is, to pay to ANZBGL reinsurance claims when due, which in turn creates a counterparty credit risk);</p> <p><b>reputation risk</b> (being the risk of loss that directly or indirectly impacts earnings, capital adequacy or value, that is caused by: adverse perceptions of ANZBGL held by any of customers, the community, shareholders, investors, regulators, or rating agencies; conduct risk associated with ANZBGL's employees or contractors (or both); or the social or environmental (or both) impacts of ANZBGL's lending decisions);</p> <p><b>strategic risk</b> (being the risk that ANZBGL's business strategy and strategic objectives may lead to an increase in other material risks - for example: credit risk, market risk and operational risk);</p> <p><b>technology risk</b> (being the risk of loss and/or non-compliance with laws resulting from inadequate or failed internal processes, people and/or systems or from external events impacting on IT assets, including the compromise of an IT asset's confidentiality, integrity or availability).</p> <p>If any of these key risks actually occurs, ANZBGL's business, operations, financial condition or reputation could be materially adversely affected, with the result that the trading price of the Notes could decline and investors could lose all or part of their investment. Importantly, ANZBGL's risk profile at any point in time, including the probability and impact of certain risks occurring, is heavily influenced by (and invariably changes over time according to) prevailing general business, economic and market conditions in the major countries and regions in which ANZBGL operates or trades.</p> |
